

Easy Box Intra

Systematically flexible organisation: a simple insert system allows the Easy Box Intra to be divided into custom-sized compartments. It's the perfect flexible packaging and shipping solution for products with varying sizes.

The Easy Box Intra is specially designed as reusable packaging for small parts. The compartments can be adjusted individually to match the product sizes, avoiding unnecessary empty areas – and consequently saving space and costs during both storage and shipping. The plywood system is easy to slot together and does not require any screws or nails. A surrounding strap secures the Easy Box Intra for extra stability. The box is equally quick and easy to disassemble, and can then be stored compactly for future use. A seal fastened to the joints indicates when the box has been opened.
